

Baby Swallow Guideline

- Please give all daytime meals orally by bottle (**HALF in first hour and THE REST in the second hour**).
- Total of **ALL daytime feeds** will be given orally-daily
- Place baby in an upright/prone position during feeding

- Burp the baby 2-3 times during feeding and after .
- **STOP ALL ORAL FEEDING BY 6 PM.**
- Elevate the head of the bed by 30 after feeds.
- Please note any changes in SPO2, skin colour, work of breathing (if these or significant other cardiopulmonary changes noted during or shortly after feeding please discontinue feeding and consult Dr/SLP).
